

New Version Released

We recently released Intelicode® Version 15.0.9.3 with Provided Database v99.2. Updating to the new version is essential for P.A.T.H.™ users. Any existing 2019 visits created with versions prior to 15.0.9.3 with Teaching Physicians will need to be reviewed and updated due to guideline changes.

We just want to remind you to always backup your databases before making any changes (Intelicode® is NOT responsible for data loss). Also, users sharing a database should all update at the same time; the database version will update and access will be denied to those who have not updated.

Click the link below to access our update page. If you have questions or require assistance, please contact us (contact info is in the footer).

Recently Asked Questions

Q. I have a time in Psychotherapy Face to Face, so why is the code not populating?

A. When selecting a psychotherapy service type, you would enter time under Face to Face.

Psychotherapy Face to Face is used when psychotherapy time is included in a non-psychotherapy service.

Q. Am I able to reorder the Audit Summary and Custom Provider Accuracy report columns?

A. Yes! In Visit Summaries, place the columns in the order that works best for you by dragging the column header(s) with your mouse (if you have a touch screen, can use your finger).

Future Newsletters

We would love to hear from you about what you would like to read in our newsletters. Click the button below to email us (or see our email address at the bottom of this newsletter), and we will do our best to include all of the suggestions.
