

Intellicode® version 18.0.0.2 is available now.

Intellicode® 18.0.0.2 is available for download and installation. This update includes the 2023 CPT codes 2023 and AMA guidelines. You will need to install this update to enter visits with 2023 dates.

Visit [Intellicode.com/update](https://intellicode.com/update) to view the change logs and to update to the newest version. Please remember to always back up your data before any update.

Running the program after the installation will attempt to update your databases. As this is a new update it is possible some antivirus products will consider this to be an unknown file. All of the files we publish are free from any virus or malware content when published. Checking the digital signature will ensure they have not been modified.

What's new?

2023 Guideline changes

- History and Exam Changes – Codes that required History and Exam levels in 2022 will only require that a medically appropriate history and/or examination in 2023. This requirement can be recorded by answering the “History and/or Exam” question on the patient screen.
- Prolonged code changes – CPT and CMS have added new 2023 prolonged codes for various services. The “Prolonged Services CPT/CMS” question will determine which codes are used. These codes use different time thresholds.

2022 has seen several enhancements to Intelicode, including:

- Productivity Report – Select the Productivity report to group visits and show separate statistics for each reviewer.
- CMS Split/Shared Guidelines – Check the Split/Shared Visit box on the Patient screen to access the Additional Provider field and questions.
- IntelliNote performance improvements – IntelliNote can import multi-page documents more quickly and requires less memory overall.

Recently Asked Questions (Q & A)
